

Sunrise Lake Watershed Management Plan

**REDUCE TOXIC ALGAL BLOOMS
REDUCE POLLUTION CONTRIBUTORS
IMPROVE OUR LAKE'S WATER QUALITY**

WHAT IS A WATERSHED MANAGEMENT PLAN?

This plan identifies problems and threats to water resources and develops a framework to address these issues within a specific watershed. It's a tool with specific recommendations to improve and sustain water quality for those currently using the lake and future residents.

WHAT CAN I DO?

Fill out our confidential septic system survey, which is available on our website and will be mailed out to residents living along the lake in June 2021, for a chance to win a gift card to Tumbledown Cafe. Results will be used to determine what resources are needed to best protect the lake's water quality.
